

# Addendum #2

## Project Information

**Project Name:** Island Grove Well A Replacement

**Bid Number:** F23-05-048

**Date:** August 4, 2023

**Project Manager:** Ryan Duve

## Addendum Questions

**Question #1** Is there an Engineer's Estimate?

**Answer** No, there is no Engineer's Estimate.

**Question #2** Which hydrant may we use for supplying water during drilling?

**Answer** The hydrant nearest to the well site (within the arena area) may be used for drilling water supply. Refer to attached figure. The parks department drives equipment and vehicles between well site and fire hydrant, so a ramp will be needed so that traffic is not impacting the hose. Also, refer to Section 01010 1.07 for information regarding using a city fire hydrant for construction water purposes.

**Question #3** Will the stored materials inside the well house be removed?

**Answer** Yes, the stored materials will be removed prior to work commencing.
